

## COAD, will be exhibited Speed-Door for indoor in '2017 COPHEX'

It has several speed doors for pharmaceutical, food and cosmetics factories

COAD will participated in the 12th Cosmetic Pharmaceutical Machinery & Equipment(COPHEX 2017) held at the KINTEX from April 18 to 21.

In this Exhibition, Among the 13 types of high-speed automatic doors, will show industrial automatic doors suitable for indoor environments.

COAD industrial doors are made of aluminum so resistant to deformation and corrosion, making them suitable for hygiene-sensitive pharmaceuticals, cosmetics and food companies. Drums and frames are made in round form to keep dust from accumulating, helping to maintain cleanliness.

COAD has representative indoor models are Slim Model(COAD-2) and Clean Room Model(COAD-5). Motor of Slim Model(COAD-2) is installed inside the drum unit which enables to create additional space around the motor unit. Water resistant. Convenient to install in limited spaces such as hallways and walkways.

Clean Room Model(COAD-5) is the premium auto door system designed for clean room areas equipped with various types of sensors. Suitable for the spaces required to build a complete clean environment. Commonly used in conjunction with an air shower. This model is equipped with COAD hermetic seal which provides tight seal.
